

WEEE & EEE Compliance Statement

Z-Press Tools – Manufactured by Zupper, Imported and Distributed by Cubralco Ltd

Date: November 2025

Version: 1.0

Introduction

Z-Press Tools are committed to full compliance with the UK Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 (as amended) and the Restriction of the Use of Certain Hazardous Substances (RoHS) Regulations. As an importer and distributor of electrically operated press tools, Cubralco Ltd recognises its shared responsibility with the manufacturer, Taizhou Juli Tools Co. Ltd, to minimise the environmental impact of electrical and electronic equipment (EEE) placed on the UK market.

Manufacturer and Importer Responsibilities

Taizhou Juli Tools Co. Ltd designs and manufactures Z-Press Tools in accordance with the essential requirements of the WEEE and RoHS Directives. All tools are labelled with the crossed-out wheeled-bin symbol, indicating that they must not be disposed of with general waste.

Cubralco Ltd, as the UK importer and distributor, ensures that all Z-Press Tools supplied into the UK are registered under an approved WEEE compliance scheme and meet all UK obligations for producer registration, data reporting, and financing of take-back and recycling activities.

Product Stewardship

Z-Press Tools are engineered for durability and designed for circularity. Through our **Reduce, Reuse and Recycle (3R's) Initiative**, Cubralco and Zupper actively support end-of-life management of products by:

- **Reduce:** Minimising material use and packaging through efficient design and logistics.
- **Reuse:** Extending tool life through authorised servicing, refurbishment, and component recovery.
- **Recycle:** Operating a take-back scheme for end-of-life Z-Press Tools, batteries, and accessories to ensure safe collection and environmentally sound treatment.

Take-Back and Recycling Scheme

When a Z-Press Tool reaches the end of its service life, users are encouraged to return the unit via the Z-Press take-back programme. Returned equipment is collected, logged, and transferred to an Approved Authorised Treatment Facility (AATF) for recycling and recovery in accordance with UK WEEE regulations.

Commitment to Compliance

Z-Press and Taizhou Juli Tools Co. are dedicated to continuous improvement in product design, compliance, and sustainability. We work with our manufacturing partners, merchants, and installers to ensure that every stage, from design and import to end-of-life treatment, meets our environmental and regulatory obligations under UK WEEE and EEE legislation.
